Software Engineer | Web Development

# About me.

I'm Nilo Venturin Neto, a Software Engineer based in Brazil with a degree in Systems Analysis and Development. I build web systems and internal applications for companies and public institutions, from requirements gathering to deployment.

I write custom code instead of relying on website builders. That means faster, more secure pages that are easy to evolve, with full freedom over layout and integrations.

Every project starts with your goal: generating leads, selling a service, presenting your business or automating a process. Scope, timeline and budget are defined from there, with clear deliverables and direct communication in English.

## Tech stack

Next.js and React
TypeScript and JavaScript
Java and Spring Boot
SQL databases
HTML, CSS and Tailwind

## Deliverables

Responsive websites
Technical SEO and performance
Admin dashboards
API integrations

01

# Landing page.

A single conversion-focused page, ideal for capturing leads, promoting a service or launching a product.

### Includes

- Custom, fully responsive layout
- Hero, services, testimonials and contact sections
- Contact form and/or WhatsApp button
- Basic SEO and speed optimization
- Google Analytics and Meta Pixel integration
- Deployment to your own domain

Investment

**US$ 600 – 1,200**

Timeline

1 to 2 weeks

02

# Business website.

A 4 to 8 page website that presents your business with credibility and gets found on Google.

## Includes

- Pages such as Home, About, Services and Contact
- Your brand identity applied to the layout
- Contact forms delivered by email
- On-page SEO on every page and sitemap
- Google Maps and social media integration

Investment

**US$ 1,500 – 3,000**

Timeline

4 to 6 weeks

# 03

# Website + CMS.

A business website where you edit the content yourself, without depending on a developer.

**Includes**

- Everything in the business website
- Admin panel to edit text, images and services
- Blog or news section
- Users with access levels
- Training on how to use the panel

Investment

**US$ 3,000 – 6,000**

Timeline

6 to 10 weeks

04

# Custom web app.

Web applications with user accounts, data management, business rules, reports and integrations.

**Includes**

- Requirements gathering and scope definition
- Milestone-based development with partial deliveries
- Database and authentication
- Integrations with other systems and APIs
- Priced from estimated hours (US$ 35/h)

Investment

**Custom quote**

Timeline

**Defined in the scope**

Optional monthly plan to keep your website online, secure and up to date after delivery.

# 05
# Maintenance.

**Basic** **US$ 40** /month

- Hosting and SSL certificate
- Regular backups
- Security updates

**Complete** **US$ 120** /month

- Everything in Basic
- Up to 3 hours of changes per month
- Small improvements and content updates

# General terms.

### Payment

50% upfront and 50% on delivery, in US dollars via international transfer. Larger projects can be split into milestones.

### Revisions

Up to 2 rounds of layout revisions. Changes outside the approved scope are quoted separately.

### Content

Copy, images and logo are provided by the client. Copywriting can be quoted separately.

### Domain and hosting

Not included in the packages (usually US$ 10 to 25 per month), unless a maintenance plan is hired.

### Warranty

30 days after delivery for bug fixes.

### Validity

Reference prices, valid for 30 days. The final quote is defined after the briefing.
