SUMMARY

Full-stack software engineer with 6+ years in tech, building systems for critical, regulated operations: SPAs in TypeScript (React, Next.js, Angular), REST APIs in Node.js and Java/Spring Boot, and data models in PostgreSQL and Oracle. I lead development of ISEO, the Espírito Santo Fire Department's shift system, and coordinate SIAT, its fire-safety licensing platform. Access-governance and SOX work gave me a security and audit mindset, and I use AI daily in my development workflow.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), Java, SQL, PL/SQL, PL/pgSQL, HTML/CSS, ADVPL, PHP · learning Go
Front end:	React 19, Next.js (App Router), Angular, PO UI, Tailwind CSS, shadcn/ui, Radix UI
Back end & APIs:	Node.js, REST APIs, Supabase Edge Functions, Spring Boot, OAuth2/OIDC (Keycloak)
Databases:	PostgreSQL (row-level security), Oracle, Supabase, Drizzle ORM, Flyway
Testing & CI/CD:	Unit and integration tests (Vitest, Jest, JUnit), code review, CI/CD with GitHub Actions, Docker, Vercel
AI-assisted dev:	Claude Code and ChatGPT (daily), context files (AGENTS.md, CONTEXT.md), ADRs
Domain:	TOTVS RM, TOTVS Protheus, IAM, RBAC, SoD, SOX, ITGC, LGPD

PROFESSIONAL EXPERIENCE

Software Engineer · PVT Software · *Remote* **Jun 2024 – Present**
TOTVS-certified partner delivering ERP customization, software engineering and automation.

- Proposed **Argos**, a SoD platform that applies approved access changes to TOTVS RM with a full SOX audit trail, built with a small team up to a client PoC.
- Built Argos's PostgreSQL data layer (migrations, PL/pgSQL, row-level security), Node.js/TypeScript service and Supabase Edge Functions. Every ERP write is read back; unconfirmed changes go to manual review instead of being retried.
- Day to day, build React/Next.js front ends and Node.js APIs on PostgreSQL and Oracle for ERP clients, plus TOTVS RM customizations and SQL/PL-SQL jobs that cut manual work by 6+ hours a day.
- IT risk matrices, ITGC testing and remediation plans for clients' annual SOX certification.

Software Engineer · Corpo de Bombeiros Militar do Espírito Santo (CBMES) · *Vitória, ES, Brazil* **Mar 2026 – Present**

- Lead developer of **ISEO** (Java 25/Spring Boot, Angular 20), the system that runs the corporation's paid extra shifts end to end. It models the organization itself: units and duty posts, teams by role, ranks and seniority from the personnel registry, and each firefighter's qualifications and eligibility.
- Monthly planning in one place: fixed and one-off shifts, batch call-ups, voluntary sign-ups with a fairness-ordered draw, compulsory assignment, swaps and notifications; rule overrides need explicit permission and are audit-logged.
- Coordinate **SIAT**, the state platform for fire and panic safety processes, licensing and inspections; run a weekly session with a small team to design the delivery pipeline and review code.
- Co-develop the central auth BFF for CBMES apps (OAuth2/OIDC with Keycloak, sessions shared through Redis). 26 Flyway migrations, JUnit and Angular tests, ADRs, Docker deploys via GitHub Actions.

Systems Analyst · Grupo Coroa · *Espírito Santo, Brazil* **May 2023 – May 2024**

- TOTVS Protheus routines in ADVPL, REST APIs for PO UI (Angular) screens, ERP integrations and a Next.js landing page.

Systems Analyst, IAM & GRC · Vennx · *Remote* **Dec 2021 – May 2023**

- Designed and implemented RBAC models for TOTVS RM, Active Directory, Microsoft Admin and other client systems.
- Ran segregation-of-duties reviews across 10,000+ users, bringing critical conflicts to zero; automated analysis with SQL.
- Supported SOX through access reviews and ITGC testing; adapted access governance to LGPD/GDPR.

Front-End Developer · Freelance · *Remote* **Mar 2020 – Nov 2021**

- Built React front ends for freelance clients.

Web Designer · Netsimples · *Vila Velha, ES, Brazil* **Jan 2019 – Feb 2020**

- Built client websites from requirements to launch: WordPress/PHP themes and React, JavaScript and CSS front ends.

PROJECTS

- **Rotina** · github.com/dev-nilo/rotina · Offline PWA that shows what to do now from a weekly routine. An assistant on the Claude API turns short Portuguese requests into schema-validated JSON edits the user approves; reminders through Web Push on a Cloudflare Worker. JavaScript, Service Worker, Claude API.
- **Cat-modoro** · cat-modoro.vercel.app · Pomodoro timer with a pixel-art cat drawn in code. Next.js, TypeScript, Vitest.
- **Squadra** · squadra-eight.vercel.app · Multi-tenant team-draw app; each account's data is isolated with Supabase Auth and row-level security. Next.js 16, React 19, TypeScript, Vitest.

EDUCATION

Technologist Degree in Systems Analysis and Development · Multivix **2022 – 2024**
Certification: curso.dev, full-stack Node.js/Next.js (2025) · Languages: Portuguese (native), English (B2+, near C1)
