SUMMARY

Full-stack software engineer with 5+ years in software development. I build web apps in TypeScript (React, Next.js, Angular) and APIs in Java/Spring Boot and Node.js, on PostgreSQL and Oracle. I also know the governance side of software: I've designed role-based access models, run segregation-of-duties reviews and supported SOX certifications, so when I build a feature I already think about who can access it and how it will be audited. I work with AI coding agents from repository context files and architecture decision records, splitting features into small, reviewed pull requests.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL, PL/SQL, PL/pgSQL, ADVPL, PHP

Front end: React 19, Next.js, Angular (PO UI), shadcn/ui, Radix, HTML/CSS

Back end: Node.js, Spring Boot, REST APIs, Supabase Edge Functions, OAuth2/OIDC (Keycloak)

Data: PostgreSQL (row-level security, Flyway migrations), Oracle, Supabase

DevOps: Docker, GitHub Actions, Vercel

ERP & governance: TOTVS RM, TOTVS Protheus · IAM, RBAC, SoD, SOX, ITGC, LGPD/GDPR

EXPERIENCE

Software Engineer — PVT Software, Remote

Jun 2024 – Present

TOTVS-certified partner delivering ERP customization, software engineering and automation since 2012.

Argos (SOD Analyzer) — segregation-of-duties platform for TOTVS RM

- Came up with the idea and built it with a small team, from first concept to a client proof of concept.
- Analysts design access profiles, run risk analyses, send them for approval and apply approved changes to the ERP, with a full audit trail for SOX.
- Built the PostgreSQL data layer: migrations, PL/pgSQL functions and row-level security for risks, analyses, approvals and evidence.
- Wrote the Node.js/TypeScript service and Supabase Edge Functions behind the SoD engine; redesigned the React 19 front end with shadcn/ui and Radix.
- Every write to the ERP is read back to confirm it; anything that can't be confirmed goes to manual review instead of being retried.

Also at PVT

- TOTVS RM customizations and SQL/PL-SQL programs on Oracle; reports, integrations and scheduled jobs that cut manual work by more than 6 hours a day.
- IT risk matrices, ITGC testing and remediation plans for clients' annual SOX certification.

Systems Analyst — Grupo Coroa, Espírito Santo, Brazil

May 2023 – May 2024

- Developed and maintained TOTVS Protheus routines in ADVPL and built REST APIs for PO UI (Angular) screens.
- Worked on ERP integrations, customizations and improvements; analyzed and streamlined system processes.
- Redesigned the company's landing page with Next.js.
- Technical support for internal requests, process documentation and team practices.

Systems Analyst – IAM & GRC — Vennx, Remote

Dec 2021 – May 2023

GRC consultancy and technology company serving clients in energy, logistics, healthcare and agribusiness.

- Designed and implemented role-based access control (RBAC) models for TOTVS RM, Active Directory, Microsoft Admin, Elaw, Hyperion, Gesplan, PZM, Abax and AccessOne.
- Ran segregation-of-duties reviews across 10,000+ users, identifying and remediating critical conflicts down to zero.
- Supported SOX compliance through user access reviews, ITGC testing and evidence collection for external audits.
- Helped clients adapt access governance processes to LGPD and GDPR requirements.
- Used SoD Discovery and SQL to automate access analysis and reporting.

Web Designer — Netsimples, Vila Velha, ES, Brazil

Jan 2019 – Feb 2020

- Designed and built websites and blogs for clients, from layout to launch.
- Built WordPress themes and custom features in PHP, and front ends with React, JavaScript/jQuery, HTML and CSS.
- Took part in each project from the first client conversation: requirements, layouts and responsive pages.

PROJECTS

- **Squadra** — balanced team draws with Next.js and Supabase · squadra-eight.vercel.app
- **SoD Profile Validator** — fuzzy matching of ERP permission profiles · sod-theta.vercel.app
- **Cat-modoro** — Pomodoro timer with a pixel-art cat drawn in code · cat-modoro.vercel.app

EDUCATION

Bachelor's in Computer Systems Analysis — Multivix

2022 – 2024

LANGUAGES & CERTIFICATIONS

Languages: Portuguese (native), English (full professional)

Certification: curso.dev
