

NILO VENTURIN NETO

Full-Stack Software Engineer · TypeScript · React · Node.js · Java · SQL

Vitória, Espírito Santo, Brazil (Remote) · +55 27 99923-2154 · venturin.nilo@gmail.com · linkedin.com/in/niloventurin · github.com/dev-nilo

SUMMARY

Full-stack software engineer building SPAs in TypeScript (React, Next.js, Angular), REST APIs in Node.js and Java/Spring Boot, and data models in PostgreSQL, Oracle and MySQL. 3+ years developing for TOTVS ERPs, after access-governance work where I ran segregation-of-duties reviews for 10,000+ users, so I build features with access, auditability and tests in mind. I use Claude Code every day, with repo context files, ADRs and small reviewed pull requests.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), Java 21, SQL, PL/SQL, ADVPL, PHP
Frontend	React 19, Next.js (App Router), Angular, SPAs, Tailwind CSS, shadcn/ui, Radix UI, PO UI, Vite
Backend & APIs	Node.js, Spring Boot, REST APIs, JPA/Hibernate, OAuth2/OIDC (Keycloak), RBAC
Databases	PostgreSQL, Oracle, MySQL, Supabase, Redis, SQLite · Drizzle ORM, Flyway, row-level security
Testing & DevOps	Vitest, Jest, JUnit · Git, GitHub Actions, Docker, Vercel, AWS (EC2, S3)
AI-assisted dev	Claude Code (daily): context files (AGENTS.md, CONTEXT.md), ADRs, one reviewed PR per task
Domain	TOTVS RM, TOTVS Protheus · IAM, SoD, ITGC, SOX, LGPD

PROFESSIONAL EXPERIENCE

PVT Software <i>Software Engineer · TOTVS-certified partner, ERP and software engineering</i>	Jun 2024 - Present <i>Remote</i>
- Rebuilt SOD Analyzer, PVT's segregation-of-duties tool for TOTVS RM, as a full-stack web app. Analysts run SoD analyses on permission profiles and send each one to a separate approver portal, with an audit log and PDF/XLSX exports. - Built authentication, row-level security, the approval workflow and exports on Supabase, and redesigned the dashboard, analysis, login and approval-inbox pages with shadcn/ui and Radix. Stack: Next.js, React 19, TypeScript, Tailwind CSS, Supabase. - Develop TOTVS RM customizations and SQL/PL-SQL programs on Oracle, from requirements to production rollout. Built reports, integrations and scheduled jobs that cut manual work by more than 6 hours a day. - Built IT risk matrices and tested IT general controls (access, change management, IT operations) for clients. Supported the annual SOX certification by finding ITGC deficiencies and designing and testing remediation plans.	
Grupo Coroa <i>Systems Analyst</i>	May 2023 - May 2024 <i>Espírito Santo, Brazil</i>
- Developed and maintained TOTVS Protheus routines in ADVPL and built REST APIs for PO UI (Angular) screens. - Built ERP integrations and customizations, and redesigned the company's landing page with Next.js.	
Vennx <i>Systems Analyst · IAM & GRC consulting</i>	Dec 2021 - May 2023 <i>Remote</i>
- Designed and implemented role-based access control (RBAC) models for TOTVS RM, Active Directory, Microsoft Admin, Elaw, Hyperion, Gesplan and other client systems. - Ran segregation-of-duties reviews across more than 10,000 users, bringing critical conflicts down to zero. Automated access analysis and reporting with SQL and Vennx's SoD Discovery. - Supported SOX compliance through user access reviews, ITGC testing and evidence collection for external audits, and helped clients adapt access governance to LGPD and GDPR.	
Netsimples <i>Web Designer</i>	Jan 2019 - Feb 2020 <i>Vila Velha, Brazil</i>
Designed and built client websites from requirements to launch: WordPress themes and features in PHP, and front ends in React, JavaScript, HTML and CSS.	

PROJECTS

- SoD Profile Validator** sod-theta.vercel.app · Matches TOTVS RM permission profiles to an access-governance catalog using exact, code-normalized and fuzzy (Levenshtein) matching, then exports a CSV for import. Next.js, TypeScript, Drizzle ORM, PostgreSQL (Neon), Vitest.
- Squadra** squadra-eight.vercel.app · Multi-tenant app for player cards and balanced team draws. Each account's data is isolated with Supabase Auth and PostgreSQL row-level security. Next.js 16, React 19, TypeScript, Vitest.

EDUCATION

Bachelor's degree in Computer Systems Analysis, Multivix Certification: curso.dev (full-stack Node.js/Next.js) · Languages: Portuguese (native), English (intermediate)	2022 - 2024
